Magic series MPPT Solar charge controller

10/15/20/30/40A

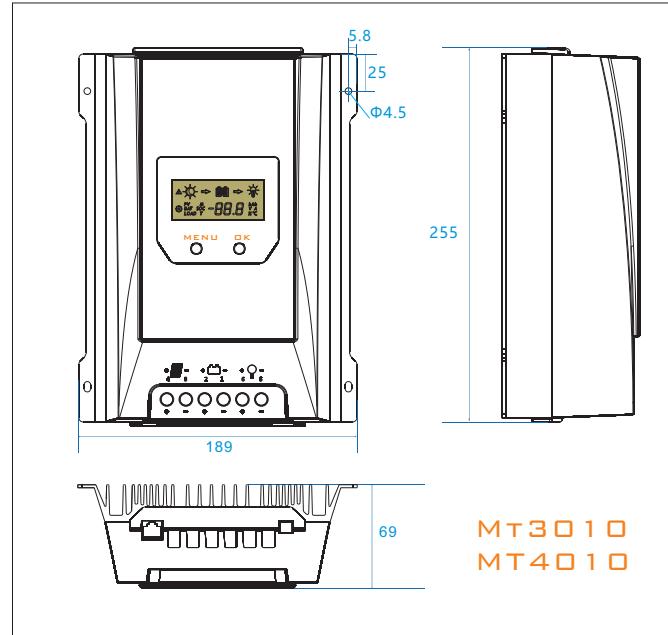

MPPT, LCD display , RS485, 12/24V system voltage

- Innovative Max Power Point Tracking(MPPT) technology, tracking efficiency >99%
- Full digital technology, high charge conversion efficiency up to 98%
- LCD display design, read operating data and working condition easily.
- Real-time energy statistics function.
- 12V/24V automatic recognition
- AGM,Liquid and GEL battery for selection
- External temperature sensor, automatic temperature compensation
- Built-in temperature sensor, when the temperature exceeds the set value, the charging current will lower down followed by the decrease of temperature, so as to control the controller's temperature rise
- Four stages charge way: MPPT, boost, equalization, float
- With current-limiting charging mode, when the power of solar panel is over-sized and charging current exceeds the rated current, the controller will lower the charging power, which enables the system to work under the rated charging current
- Multiple load control modes: Standard, Dusk to Dawn, Timer and User-defined mode.
- Based RS-485 standard Modbus protocol, to maximize their communication needs of different occasions.
- Perfect EMC & thermal design
- Full automatic electronic protect function
