

This DGM series solar charge controller is a easy control series, which has the light indicator on the surface. Besides, the whole metal case helps the heat dissipation quickly. With a USB port max 5V1.5A output at the side of each model, people can charge mobile phone, DC fan and other DC electronic devices.

PRODUCT FEATURES

1. With over load protector
2. With over charge protector
3. With over against charge protector
4. When the solar panel supply power to the SOLAR charger and the indicator light get shine the battery charged, and the solar panel supply power to electric equipment at the same time.
5. When the battery be charging , the indicator light(10V,11V,12V,13V)will shine one by one , with the voltage of battery be increasing .
6. When the indicator light get of shine .it shows that battery is fully charged.
7. Please make sure the input voltage of electric equipment is DC 12V

TECHNICAL PARAMETER

Type	Output Curren		External package size	N.W	G.W	Qty per carto
	Voltage	MaX				
DGM-1210	12V	10A	49.5*34*29.5CM	13.5KG	16.0KG	50PCS/CTN
DGM-1215	12V	15A	49.5*34*29.5CM	14.0KG	16.5KG	50PCS/CTN
DGM-1220	12V	20A	64*38.5*30.5CM	25.0KG	29.0KG	50PCS/CTN
DGM-1230	12V	30A	64*38.5*30.5CM	26.0KG	30.0KG	50PCS/CTN

Indicator Light:

- Solar panel supply power
- battery charged
- battery charged full
