

# ABB central inverters

## PVI-500.0-CN

### 500 kW

This product offers high performance with affordable capital expenditure and has been specifically designed for the fast growing Chinese market.

ABB's new 500kW utility-grade central inverters have a number of key features.

It offers high efficiency with electrolytic capacitor-free leading to longer MTBF (mean time between failures).

This product design is the result of the experience we have acquired with more than 100MW of installation in the challenging Chinese market.

Maximum input voltage up to 1000 Vdc, high design flexibility and reduced DC distribution losses for large scale PV plants.

**Reverse-polarity protection minimizes potential damage caused by array mis-wiring**

Transformerless inverter for direct connection to MV transformer leading to longer MTBF (mean time between failures).
