

Sheet Metal Roofing Systems

KM-CT : Corrugated & Trapezoidal Roof Systems

The KM-CT is an essential element in the cases of sheet metal roofing. The design incorporates heavy duty and fatigue resistant steel mounting fixtures, ensuring your solar PV investment retains its strength and stability from the day it was installed.

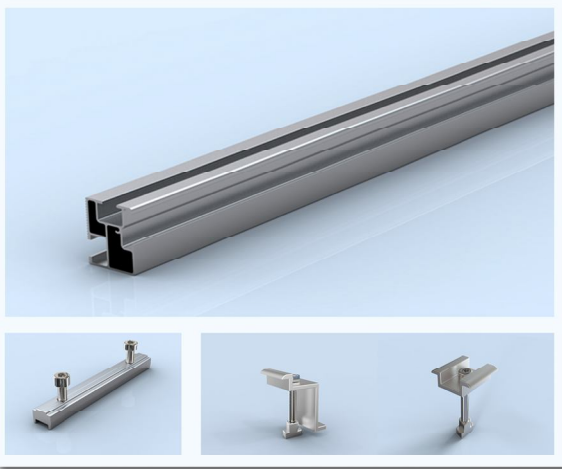

Racking Fasteners

Features

- Stainless steel fastening bolts with built in waterproof/weather resistant washers
- Installed in conjunction with our mounting rails, enabling support for a great variety of panels
- Designed to be installed on a wide range of corrugated and raised trapezium sheet metal roofing
- Specially designed one piece drilling and mounting fastener enabling easy and quick installation
- Precision cut aluminum components combined with easy installation procedures

Associated Rail Components

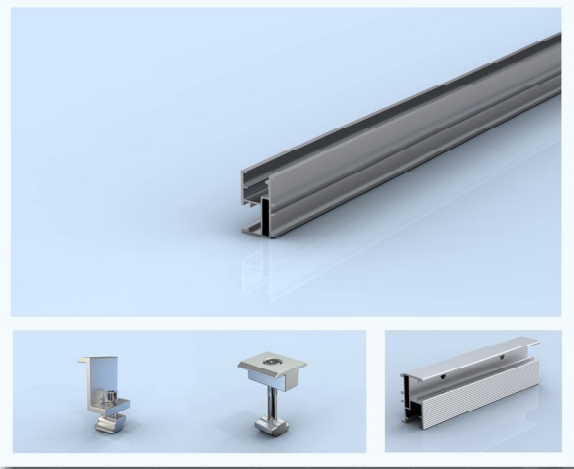

Mounting Rail KR-M5

Splice Connector SC-H9

Mid Clamps & End Clamps

Mounting Rail KR-J53

Splice Connector SC-J33
