SOL-50 SOLAR CARPORT

The SOL-50 solar carport can be used as a single, double or group carport - permitting for extension at any time. The carport consists of a wooden support structure which is fixed with post anchors on four fundaments. It is delivered as a pre-assembled kit and allows for a quick and safe installation of framed solar modules up to 50 mm frame height. Cable protection nets for a safe cable laying as well as the use of corrosion resistant materials guarantee the proper functioning of the solar system beyond the specified product lifetime.

BENEFITS AT A GLANCE

TECHNOLOGY

- ✓ Easy to transport, delivered as a pre-assembled kit
- ✓ Permitting for extension at any time
- ✓ Utilisation as single, double or group carport
- ✓ Suitable for solar modules up to 50 mm frame height
