

Screw Foundation Solar Mounting System

Series Name : SF-I

Technical Data

- Solar system: PV plant, PV park, open area ground PV system
- System type: Ground, dual screw driven foundation
- Material Option: hot-dip galvanized steel, Aluminum ,Stainless Steel
- Ground Screw: hot-dip galvanized steel
- Max snow load: 1.0 kn/ m²
- Max wind load: 36 m/s
- Mounting angle: customized design; fixed
- Module: framed crystalline module, unframed thin film module
- Module connection: middle & end clamp
- Average thickness of zinc layer: up to 80 um or customized

Features

- cost effective
- Quick & efficient installation
- Saved installation time & Labour cost
- Fit to strong wind, heavy snow area
- Screw pile foundation makes system robust & stable
- Suitable for different , especially for hard & dry geological soil condition, like stony land, permafrost,gravel etc
- Maximum module array vertically & horizontally
- 10 years durability warranty
- 25 years anti corrosion warranty
