

Uni-Base HALD / VALR framed & frameless

Key data

- Installation friendly assembly without sealing of the surface area (no concreting necessary)
- Inclination: Standard 25°, individual design upon inquiry
- Optimized aptation to the area structure: uneven areas can also be developed
- Universal application for all frameless and framed and frameless modules
- System designed for snow-load zone II and wind zone I (other dimensioning upon inquiry)
- Small amount of components which allow for a faster installation

Technical data	
Stud distancing	3,04 m
Width/Module table	6,20 m
Height	ca. 2 m
Inclination of the modules	25°, or other
Height above ground	ca. 0,45 - 0,80 m (bottom edge of the module table)
Applied modules	Framed and frameless modules
Max. count of modules tables ¹	5
Material	Steel (S 235, hot-dip galvanized) Aluminium (EN AW 6060)

1) due to temperature strains.
