

Shingle Roof Mounting System

❖ Product Introduction

- 1) Shingle roof mounting system applies to flat shingle roof.
- 2) L foot and flashing plate are fastened on the roof by tapping screw. There is waterproof cap between them which avoid water leaking.
- 3) Only 5 groups component: flashing plate kits, L foot kits, mounting rail kits, clamp kits and grounding kits. Easy to install and save installation time.
- 4) The length of mounting rail can be customized. No need to cut on site, which protect the anti-corrosion layer.
- 5) Modular manufacture. Delivery time is about 15days.

❖ Technical Parameters

Wind Load:30m/s-55m/s	Snow Load:0.5KN/m ² -1.4KN/m ²	Panel Type : Any type
Tilt : Laying on the roof 5°-60° ,		Fastener Material :SS304
Product Material: Anodized aluminum		Standard : AS/NZS 1170
Panel layout: Portrait or Landscape		Warranty : 10years
