

GM002-Ground Aluminum Mounting System

❖ Product Introduction

- 1) Ground screw pile mounting structure applies to mountain and flat muddy area. Screw pile is piling into ground with strong viscosity that can not be pulled out.
- 2) Structure use 6063-T5 aluminum and fasteners are stainless steel. It is with good appearance and high anti-corrosion ability. This structure applies to seaside area.
- 3) Part components are pre-assembled in the factory, which reduce site installation time.
- 4) According triangle theory, this structure is stable with high strong wind and heavy wind resistance ability.
- 5) Can be customized.

❖ Technical Parameters

Wind Load: 32m/s-55m/s	Snow Load:0.5KN/m ² -1.4KN/m ²	Tilt: 10°-45°
Panel Layout: 2x10P & 4x6L, Any type panel		Fastener Material: SS304
Ground Clearance: 300mm-700mm		Pile Length:
Product Material: Anodized Aluminum 6063-T5,		Φ76*1600*3.5mm
