

Zilla® Cobra® Flat Roof Ballast System

Overview

US Patent D636,656 • Canadian Patent 138,077 • European Patent 001153548-0002

Designed for maximum speed, value and performance.

Fast Installation

The Cobra® consists of two simple components that ship pre-assembled. Cobra® units are light weight, self-aligning, field adjustable, and do not require a tape measure for layout. Requiring minimal tools and materials, the Cobra® allows installations to be completed faster than ever before.

Cost-Saving Design

The Cobra® significantly reduces the total installed cost of any size system through labor efficiencies, minimal use of materials, and lower than you can imagine shipping costs. The efficient design and environmentally friendly use of materials is a natural choice for the Cobra®.

Unrivalled Quality

The Cobra® is adaptable to any layout allowing you to work around rooftop obstacles and span great distances with ease and precision. The Cobra® is made in the US with recycled aluminum and stainless steel providing your system with corrosion resistance and durability for years to come.
