

Vegetated roof support

The heightened support design

- Sufficient distance for applications on vegetated roofs
- Optimized structural safety
- Available with angles from 15-30° in steps of 5°

The special vegetated roof support allows a mounting at a certain distance from the ground, for example in case of vegetated roofs.

Technical data

Material	Aluminum / high-grade steel 1.4301
Planning aid	Configuration and structural dimensioning with the AutoCalculator Easy and the Schletter Configurator.
Structural analysis	Structural analysis in accordance with current national standards (in Germany DIN EN 1991, EC1).
Available inclinations	15°, 20°, 25°, 30° - please specify the desired inclination when placing your order
Substructures	<ul style="list-style-type: none"> • Concrete blocks, • Gravel (SolRack, SolTub) • Sheet metal roofs (on standing seam clamps, Kalzip clamps, etc.) • Bitumen roof • Pantile roof • Foundations (for open area elevations) • etc.
