

Aluminum Tin Roof Racking System

Residential Commercial

Benefits

Economical and practical

The system is highly pre-assembled in the factory before shipment, which can save the cost and time on-site.

Compatible and reliable

The system is made of anodized aluminum AL6005-T5 and structured with international load standards. We also guarantee a 12 years warranty, and besides, its service life is over 20 years.

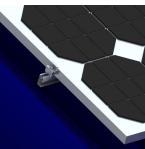

Description

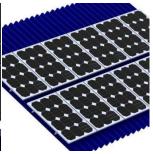

Super Solar tile roof racking system is highly tailored to meet the clients' specific needs. It can be used for framed or frameless modules. Super Solar has experienced engineer and sales teams to provide excellent products and service.

Rail and splice kit

Frameless clamps
