

# Farmland Mounting System

## System Introduction

This farmland mounting system are made by the material of carbon steel and AL6005-T5 aluminum, which have high strength and anti-corrosion. With some parts pre-assembled at the factory, this system can save on-site installation time and labor cost.

## Advantages

- \* Strong anti-corrosion, light weight and high intensity.
- \* To install over the farmland, help to economize the land utilization.
