

Solar adjustable ground mounting system is designed by professional engineer team.
 Widely use for MW ground mounting solar system, fast installation and save labor cost.
 Depends on the field conditions we come up different foundation design ,use the suitable racking post to provide high strength and withstand wind and snow loads and save the labor cost.

SOLAR ADJUSTABLE GROUND MOUNTING SYSTEM

■ Technical Image

Technical Details

Mounts Type	Adjustable ground mounting
Installation Site	Open site
Angle Slope	Up to 60 degree
Max .Building Height	Up to 20m
Wind Load	60m/s
Snow Load	1.4 kn/m2
Applicable Module	Framed or frameless
Module Orientation	Landscape or portrait
Design Standard	AS/NZS1170
Material	Al6005-T5,SS304, Hot dipped galvanized steel Q235
Warranty	10 Years warranty and 20 years service time
