

Aluminum Tin Roof Racking System

Residential Commercial

❖ Benefits

• Economical and practical

The system is highly pre-assembled in the factory before shipment, which can save the cost and time on-site.

• Compatible and reliable

The main material of the system is anodized aluminum AL6005-T5, and the fastener is made of 304 grade stainless steel. And every L-foot is cooperated with a rubber isolator.

❖ Description

Super Solar tile roof racking system is highly tailored to meet the clients' specific needs. It can be used for framed or frameless modules. Super Solar has experienced engineer and sales teams to provide excellent products and service.

❖ Technical Information

Rail and splice kit
