

AGM DEEP CYCLE RECHARGEABLE 12V/120Ah BATTERY

- Completely sealed and maintenance free
- M8 terminals
- IATA approved for safe air and road transport

Oz Charge® AGM batteries are well proven in arduous deep-cycle applications such as solar applications, backup power systems, caravans, motorhomes, camper trailers, boats etc.

OCB-120-12-SOLAR

FEATURES AND SPECIFICATIONS

Nominal voltage	12V
Cyclic voltage	14.1 - 14.4V (25° C)
Float voltage	13.6 - 13.8V (25°C)
Terminal type	M8
Weight	32.5 Kg
Dimensions	329 (L) x 173 (W) x 210 (H) mm
CCA / MCA	577A (-18°C) / 804A (0°C)
Short Circuit Current / IR	3000A / 3.19 mOhm

CAPACITY Ampere Hour (Ah)

C1	67
C3	85.4
C5	94.4
C10	104.4
C20	118
C100	136

RESERVE CAPACITY Minutes Discharged

75A	50
25A	193
20A	259
15A	372
8A	769

CYCLE LIFE Vs DOD

SICK OF BATTERIES THAT LEAVE YOU UP THE CREEK?

A significant number of AGM batteries sold today are nothing more than a conventional standby/backup battery with the words "Deep Cycle" or "DC" slapped on.

After years of R&D we are proud to announce the availability of our own Oz Charge® range of AGM batteries, made with a dedicated cyclic plate design that keeps working long after others are on the scrap heap, and unlike Calcium batteries they emit no dangerous gas so they can be installed in the boot or indoors of a caravan without health or explosion risks.

You can **EXTEND THE LIFE OF YOUR BATTERY** by using a compatible Oz Charge® Battery Charger & Maintainer.

12 MONTH WARRANTY THROUGHOUT AUSTRALIA
