# Natron Energy

# Blue Pack™ Industrial Power Battery

Safe, Reliable, High-Power on Demand

# Critical Power Applications 48v to 812v<sup>\*</sup>

- Breakthrough sodium-ion cells based on Prussian blue electrodes
- Full recharge in 15 minutes or less, ready immediately
- No settling or thermal waiting required
- UL9540A 'Champion' rated nonflammable with no thermal runaway under any condition
- >100,000 cycles
- Wide temperature operating range
- Twice the power of lithium-ion
- Round-trip efficiency >97%
- Designed for industrial power, EV fast charging, industrial mobility, grid services, decarbonization, peak shaving, and more.

### Features

# Rapid Cycle-Rate

100-0-100% SOC repeatedly with no wait, settling, or rest periods

#### Nonflammable Chemistry & Construction UL listed and independent safety study confirmed

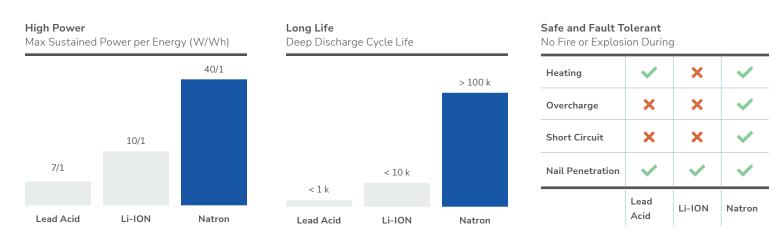

Industry leading power capacity & performance

# Introducing the Industry's Highest Power, Longest Life, Safest Battery<sup>\*</sup>

# High Power

Over 25 kW sustained discharge

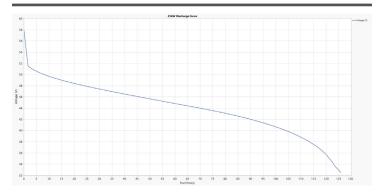

#### Power vs. Run Time

Preliminary specification subject to final product release.

\* Battle Hardened – Battery Packs and Cells survive ballistic penetration test with no Fire, acid, or dangerous chemical exposure

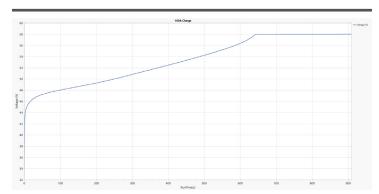

#### Discharge Performance

### Fast Recharge

Full 0 to >99% recharge in ≤15 minutes

Fast Charge Performance (16C,CC - CV)

Example shown is a 100 amp charge current.

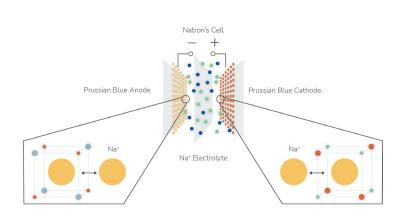

#### Controls

# Balancing Unit Interface Board Protection Board

No BMS necessary! Natron's chemistry is so safe that thermal runaway is not possible. Our onboard circuitry provides only for charging, cell balancing and communications.

#### Sodium-ion and Prussian Blue Chemistry

Sodium-ion is inherently safe and fault tolerant.

- Nonflammable during and after nail penetration or flame test.
- No damage or loss in performance from short circuit or overcharge to 35% overvoltage.
- No rare-earth materials or caustic metals.

Natron Energy, Inc. 3542 Bassett Street Santa Clara, CA 95054

#### About the company:

Natron Energy was founded by a group of Stanford scientists and engineers in 2012 to fulfill a singular mission: to offer safer, longer lasting batteries to underserved industrial and grid storage customers.

Today, Natron is a world leader in sodium-ion batteries and the first company to commercialize Prussian blue electrodes. Natron works with established pigment producers and Li-ion cell OEMs to deliver quality products via massively scalable manufacturing processes.
