

## APOLLO S-210

### Single Phase Bidirectional Inverter

- High efficiency bidirectional inverter with built-in output transformer
- High speed automatic transfer switch (4 msec) included
- Stable output voltage and frequency
- Full protection for overload, short circuit and over temperature
- Automatic low battery shutdown to protect battery
- Reverse polarity protection
- ISO 9001 and ISO 14001 certified factory
- Cooling fans with automatic speed controller
- 3-stages charging to provide quick and safe charging for battery
- LCD display and data logging (option)
- Battery temperature compensation (option)
- PC-communication with monitoring software (option)
- 2 years warranty (option for 3 and 5 years)
- Wall mounted, 19 inch rack mount and tower case

APOLLO S-210 series is stand-alone bidirectional inverter which can operate in inverter mode and rectifier charge mode. It provides highest reliable for stand-alone solar electrification system with capability to receive AC supply from generator. The inverter automatically detects availability of AC power supply from the generator and change operation to rectifier charge mode in order to charge battery and supply AC power from generator to AC appliances.
