

Heavy duty, true sine wave inverters

Available in:

12 V

24 V

Offering superior quality sine wave output, the Prosine 1000i and Prosine 1800i stand-alone inverters are ideally suited for electrical systems that already have a quality multistage battery charger. Designed for recreational and industrial applications, Prosine inverters are suitable for both heavy duty and sensitive electronic loads. The inverters are lighter and more compact than others with similar power ratings because they use high-frequency switching technology in the power conversion process.

Product Features

- » Two models available: 1000 watt (1500 watt surge) and 1800 watt (2900 watt surge)
- » True sine wave output
- » Less than 3% total harmonic distortion, the Prosine delivers true sine wave output that is identical to AC power supplied by your utility. Expect trouble-free true sine wave electricity for televisions, audio systems, variable speed tools, and more
- » Removable LCD display can be mounted remotely for control and monitoring
- » Unique DC terminals offer 180-degree connections for easy installation in tight places
- » Efficient powersave mode draws only 1.5 watts under no load condition
- » Two year warranty
- » Available in 12 and 24 volt models
- » Schuko AC receptacle
- » Remote interface kit for remote mounting of display module
- » Models available with Schuko, hardwire, or hardwire with transfer switch

Protection Features

- » Over temperature shutdown and automatic overload protection
- » Over voltage and under voltage protection
- » Short circuit and AC backfeed protection
