

# GROUNDLOCK

Groundmount Solution Designed and Manufactured By

**SUNLOCK**

Sunlock's GroundMount Solution, GROUNDLOCK, is an innovative system designed for the secure and efficient installation of solar. Engineered for durability and versatility, GROUNDLOCK ensures optimal solar panel positioning while reducing installation time, and withstanding environmental stressors, providing a sustainable and reliable foundation for solar energy systems.

■ Fast & Easy  
Installation

■ Cost Effective  
Solution

■ Quality  
Assured

■ 25 Year  
Warranty

## SPECIFICATION

Application: Ground & Flat Roof

Tilt Angle: 5°-60°

Panel Layout: Portrait

Panel Type: Framed module

Foundation type: Ground Screws, Cement, Ramming Pile

Material: Zinc-Aluminum-Magnesium Coated Steel

Warranty: 25 years

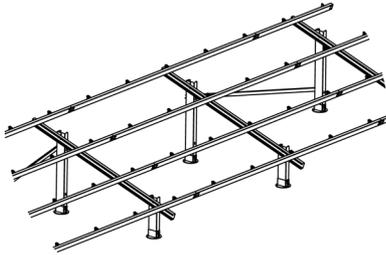

# FEATURES

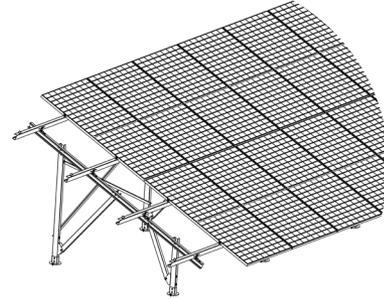

**GROUNDLOCK**

Groundmount Solution Designed and Manufactured By

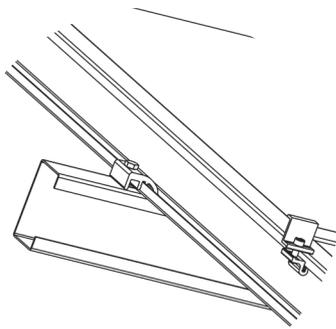

**SUNLOCK**

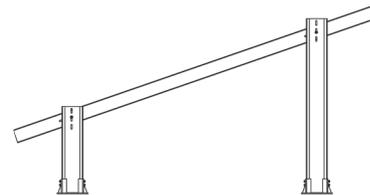

- Manufactured from Zinc-Aluminum-Magnesium Coated Steel, our products offer superior corrosion resistance, surpassing that of galvanized steel.

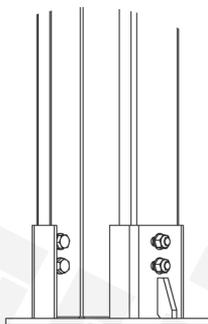

- Available with extra bracing support for large scale projects.

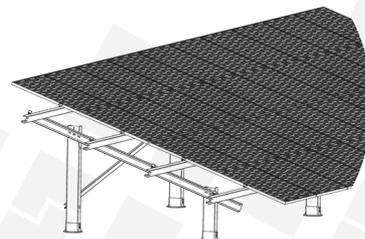

- Rails are easily installed to the upright structural support using our rail clamp.

- Strategically engineered to maximize structural integrity without compromising value.

- The base is securely fixed to the ground using anchor screws, while the column is locked in place with carbon steel bolts, ensuring stability and preventing any loosening or displacement.

- Customized designs and solutions tailored to meet various foundation requirements.
