

33. Stop Digging Ground Screws

Stop Digging Ground Screws

The TOP Energy designed [Stop Digging Ground Screws](#) is an innovative foundation solution to replace traditional concrete foundations. Designed and developed by our own factory in China, it is suitable for a variety of solar panel installation and construction projects. Our wholesales price is the best option for you.

TOP Energy brand [Stop Digging Ground Screws](#) made of high-quality galvanized steel screws are an innovative foundation solution that no need to wait for concrete to cure and allows construction to begin immediately after screws installation. It has excellent corrosion resistance and durability, suitable for use in a variety of soil types and extreme weather conditions. The Galvanized Steel Ground Screws can be used for solar panel and fences installation or more.

Manufacturer	TOP Energy
Product name	Stop Digging Ground Screws

Material	Stainless steel SUS304
Diameter	580mm to 2500mm
Color	Grey
Function	Ground Screw Foundation
Certificate	ISO9001/CE
Application	Solar farm

Product Specifications

Material: Galvanized steel (according to ISO 1461).

Length range: 580mm to 2500mm, support for extended models to accommodate deeper foundation requirements.

Certification: CE certification, ISO 9001 production facility certification, complying with international photovoltaic building standards.

Quick installation: The [Stop Digging Ground Screws](#) is good for projects processing. No need to wait for concrete to cure, construction can start immediately after installation, saving time and labor costs.

Environmentally sustainable: Compared to concrete foundations, [Helical Ground Screws](#) reduce CO2 emissions by about 60% and have less pollution on the environment.

Adaptable: the [Eco-Friendly Ground Anchors](#) designs are suitable for all kinds of terrain, including rocks, sand, wetlands, etc., and can even be installed on steep slopes.

Reusable: TOP brand [Galvanized Steel Ground Screws](#) can be easily removed and reused, reducing waste of resources.

High load capacity: Each [Stop Digging Ground Screws](#) can withstand up to 10 tons of load, ensuring the stability of the structure.

FAQ:

1.You are manufacture or trading company?

We are professional manufacturer leading producing solar mounting kits and screws.

2.Do you have Certificate of origin?

Yes,we could offer Certificate of Origin for sure.

3. How could I do if need to customize it according to my requirements,can you help me?

Yes. we have professional engineer team to support the customization service to you.

4: How can I request product samples?

A: You could tell our sales for the sample testing requirement, our company will handle the sample processing immediately for you.

5: How about the delivery time?

A: Accord to your order list and quantity,mostly delivery around 14- 20 days.

6: Could you offer wholesale price?

A: Yes, sure. we are Chinese factory. All our price quoted to you is the direct lowest and best factory price to you.
