Key Features

Lightweight

Optimized composite materials, 60% lighter at the same power.

Resin-fiber Strength Improvement

The modulus is as high as 1300MPa, improving the overall strength of the module and solving the hidden crack problem of the cell.

Self-developed Polymer Materials

Light transmittance $\geq 91\%$, far more than conventional solar panels, photoelectricity conversion without a barrier. Ultra-high UV blocking ability ensures power generation efficiency for 25 years.

Easy to Install

Factory-integrated for easy transportation and handling; Eliminating traditional bracket systems and saving installation costs and time.

V0 Rated flame retardant materials

Use V0 Rated flame retardant materials to improve component fire performance.
