

Solar Agriculture Mounting System

The Solar Agriculture Mounting System is suitable for both solar PV farms and ranches for power generation and cultivation. This system allows for dual use of land and is available in aluminum or steel material according to your needs. It can also be pre-assembled in advance, which makes installation easier and saves labor costs.

- Pre-assembled to save on labor costs, easy and quick to install.
- Dual use of land.
- Variety of solutions to meet different customer needs.
- Panel layout planning according to different transmittances.

TECHNICAL DATA

Solar Agriculture Mounting System

Application

Farm and ranch

Foundation

Concrete Base & ground screw

Module orientation

Horizontal

Dimension

Customized

Material

Aluminium EN AW-6005 T5
Q235 Steel Galvanized with 80 μ thickness
Fasteners A2 Quality Stainless Steel 304.

Ground Clearance

Around 3000mm

Standard

Japan JIS C 8955:2011
ASCE 7-10
Malaysian Standard 1553-2002
BS EN 1991-1-4-2005

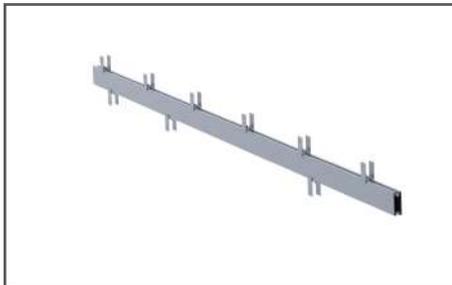

Tilt angles

0-45°

Color

Silver or Black
