Overview

Mainly applied to metal roofs, and its material is AL6005-T5. With its professional design, it can realize the perfect connection between roof support and roof to meet customer installation requirement. Professional solution and structure design can save your installation time and cost. Moreover, patented and unique design can bring you a good installation experience.

Advantages

Applicable for different metal roofs

According to customer requirement, choose different roof mounting system flexibly

Save installation time and cost

Save the installation time and cost by offering installation manual and solution

Compatible with different types of solar modules

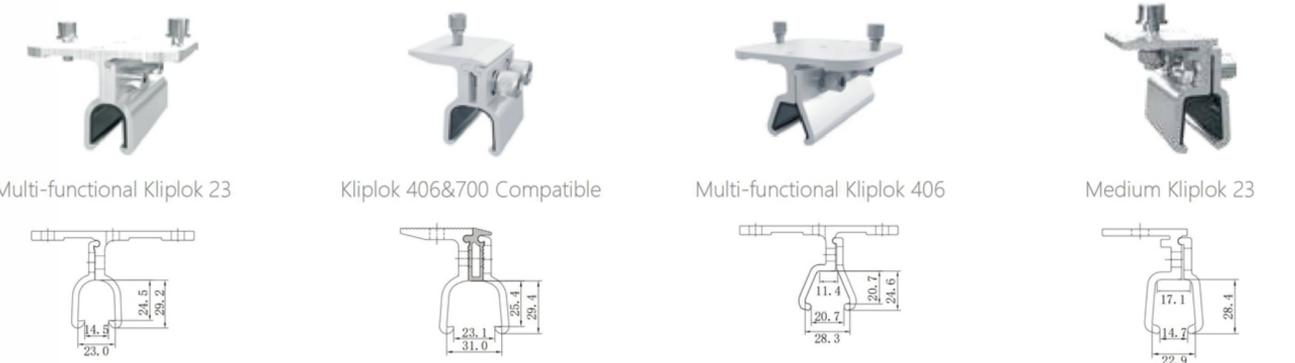

Free and flexible to choose different types of solar modules
