VERSION: 20240201-01

Product Introduction

The 50kW/115kWh air cooling energy storage system adopts an "All-In-One" design concept, with ultra-high integration that combines energy storage batteries, BMS (Battery Management System), PCS (Power Conversion System), fire protection, air conditioning, energy management, and more into a single unit, making it adaptable to various scenarios. This product features a prefabricated cabin design for flexible deployment, convenient transportation, and no need for internal wiring and debugging. It responds quickly, boasts high reliability, and offers functions such as peak shaving, power capacity expansion, emergency backup power, grid balancing, capacity management, and multi-level parallel connection.

Application Scenario

It is suitable for industrial and commercial situations with high requirements for grid continuity, and can cover communication energy storage, grid frequency modulation energy storage, wind and solar microgrid energy storage, large-scale industrial and commercial distributed energy storage, data center energy storage, and photovoltaic power generation business in the new energy field. wait.

Product Features

Standard Design

Modular "All-In-One" integrated single design for ease of transportation, convenient shipping, and straightforward maintenance.

Intelligent and Efficient

Mature energy management strategies and equipment control, intelligent operation and maintenance, remote control to maximize the product's value.

High Safety

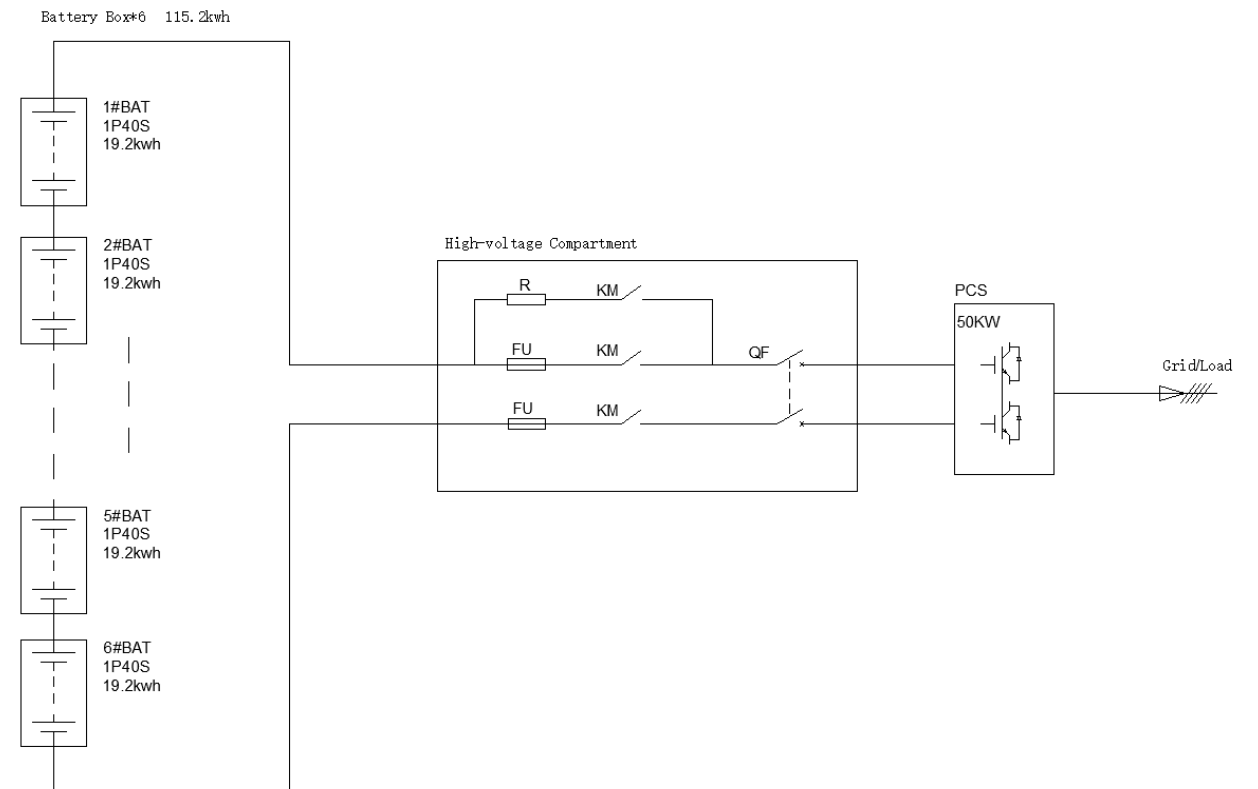

Multi-level fire protection system, graded isolation interlocking protection, and a circular air duct design to ensure the safe and stable operation of the product.

Flexible and Easy to Install

Supports multi-level parallel connection, bottom busbar design, maximizing land space utilization.

Specifications and Model Description

Product Introduction

BYHV-115SAC	
	
AC Parameters	
Rated Power	50kW
Rated Voltage	AC 380V to 415V
Rated Current	75A
Rated Frequency	50Hz/60Hz
Power Factor	0.99
Output Harmonics	< 3%
Connection Method	3P+N+PE
Isolation Method	Non-isolated
DC Parameters	
Battery Type	150Ah, LFP
Battery Grouping Method	1P240S (1P40S*6)
Battery Rated Capacity	115.2kWh
Battery Rated Voltage	768V
Battery Voltage Range	628V to 855V
Rated Charge/Discharge Current	75A
Cycle Life	≥6000 cycles (at 25°C, 0.5C, 80% Depth of Discharge)
System Parameters	
System Energy Efficiency	≥90%
Operating Modes	Grid-Tied / Off-Grid
Communication Method	CAN, 485, TCP/IP
Protection Level	IP55
Anti-Corrosion Level	C3
Noise	≤65dB
Fire Protection	Aerosol
Operating Temperature	-29°C to +50°C
Operating Humidity	0% to 95% (no condensation)
Altitude	≤2000m (derating above 2000m)
Cooling Method	Intelligent Air Cooling
Overall Dimensions (WHD)	1000mm*1900mm*1275mm
Weight	Approximately 1.4 tons

Installation Requirements

1. The installation environment should be dry, well-ventilated, free from corrosive substances, free from electromagnetic interference, and with a temperature between -29°C and 50°C.
2. The equipment should be placed on a stable surface and should maintain a certain distance from surrounding objects for heat dissipation.
3. The equipment should have reliable grounding and comply with relevant safety standards.
4. Follow the steps in the product manual or installation manual for installation and wiring.

Maintenance And Care

1. Regularly inspect the operating status of the equipment and perform necessary maintenance, including checking the tightness of terminal connections, the condition of cable equipment connections, and insulation performance.The equipment should be placed on a stable surface and should maintain a certain distance from surrounding objects for heat dissipation.
2. The battery components should be replaced regularly to ensure the normal operation of the equipment.
3. Periodically clean and maintain exhaust vents, such as air conditioning, ensuring cleaning fluids do not enter the equipment.

After-sale Service

1. We provide comprehensive after-sales service, including equipment installation, commissioning, and maintenance.The battery components should be replaced regularly to ensure the normal operation of the equipment.
2. During the equipment warranty period, we will provide free repairs or replacements. After the warranty period, we offer paid repair and maintenance services.
3. After equipment installation, we provide free safety inspections and safety training.

Precautions

1. Before installing the equipment, place it in a dry and well-ventilated environment, avoiding prolonged exposure to humid conditions.
2. Do not place flammable or explosive materials on the equipment.
3. Prohibit illegal operations and modifications on the equipment. If parameter changes are required, please contact the manufacturer or dealer.

VERSION: 20240201-02

Product Introduction

The 100kW/241kWh liquid cooling energy storage system adopts an "All-In-One" design concept, with ultra-high integration that combines energy storage batteries, BMS (Battery Management System), PCS (Power Conversion System), fire protection, energy Storage Liquid Cooling Units, energy management, and more into a single unit, making it adaptable to various scenarios. This product features a prefabricated cabin design flexible deployment, convenient transportation, and no need for internal wiring and debugging. It responds quickly, boasts high reliability, and offers functions such as peak shaving, power capacity expansion, emergency backup power, grid balancing, capacity management, and multi-level parallel connection.

It is suitable for industrial and commercial situations with high requirements for grid continuity, and can cover communication energy storage, grid frequency modulation energy storage, wind and solar micro-grid energy storage, large-scale industrial and commercial distributed energy storage, data center energy storage, and photovoltaic power generation business in the new energy field.

Product Features

Standard Design

Modular "All-In-One" integrated single cabinet design for ease of transportation, convenient shipping, and straightforward maintenance.

Intelligent and Efficient

Mature energy management strategies and equipment control, intelligent operation and maintenance, remote control to maximize the product's value.

High Safety

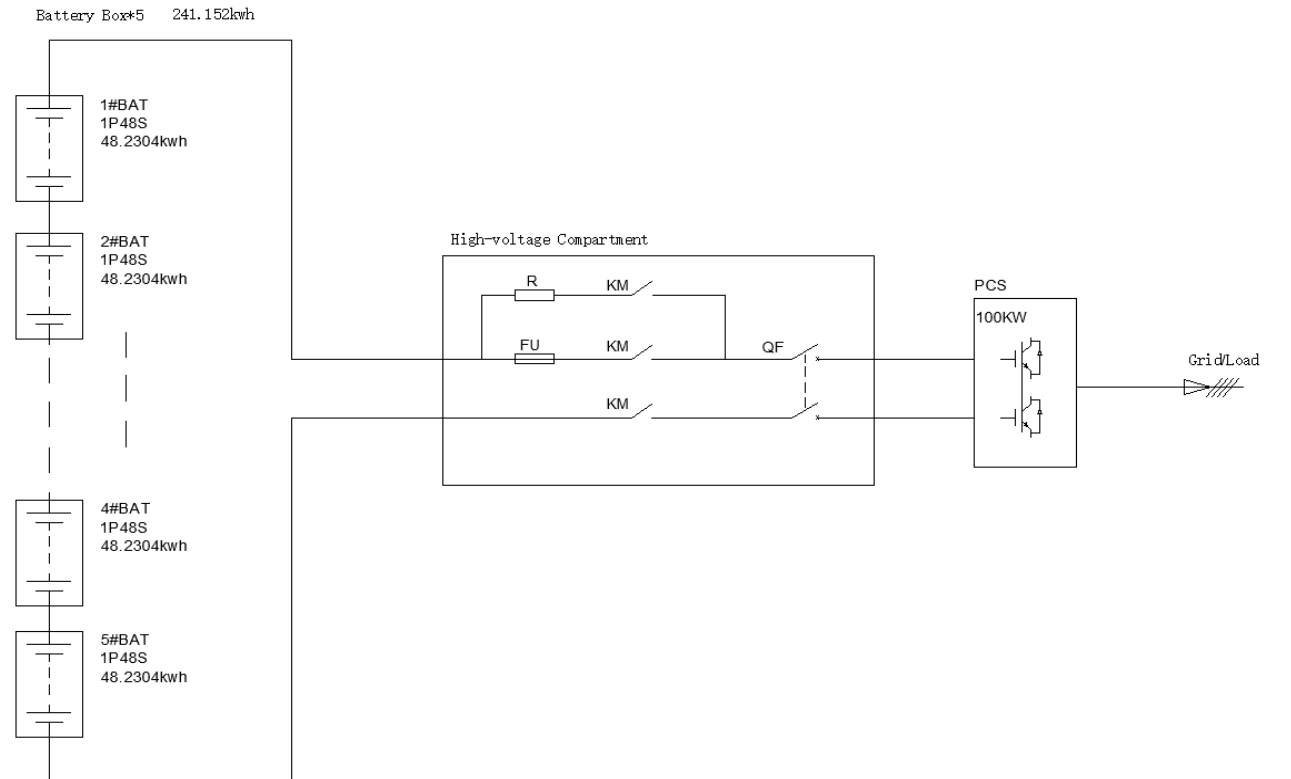

Multi-level fire protection system, graded isolation with interlocking safeguards, liquid cooling temperature control, ensuring the secure and stable operation of the product.

Flexible and Easy to Install

Supports multi-level parallel connection, bottom busbar design, maximizing land space utilization.

Specifications and Model Description

Product Introduction

BYHV-241SLC

AC Parameters

Rated Power	100kW
Rated Voltage	AC380V to 415V
Rated Current	140A
Rated Frequency	50Hz/60Hz
Power Factor	0.99
Output Harmonics	< 3%
Connection Method	3P+N+PE
Isolation Method	Non-isolated

DC Parameters

Battery Type	314Ah, LFP
Battery Grouping Method	1P240S (1P48S*5)
Battery Rated Capacity	241.152kWh
Battery Rated Voltage	768V
Battery Voltage Range	628V to 855V
Rated Charge/Discharge Current	140A
Cycle Life	≥8000 cycles (at 25°C, 0.5C, 80% Depth of Discharge)

System Parameters

System Energy Efficiency	≥92%
Operating Modes	Grid-Tied / Off-Grid
Communication Method	CAN, 485, TCP/IP
Protection Level	IP55
Anti-Corrosion Level	C3
Noise	≤60dB
Fire Protection	Aerosol
Operating Temperature	-29°C to +50°C
Operating Humidity	0% to 95% (no condensation)
Altitude	≤2000m (derating above 2000m)
Cooling Method	Intelligent Liquid Cooling
Overall Dimensions (WHD)	1320mm*2050mm*1400mm
Weight	Approximately 2.4 tons

Installation Requirements

1. The installation environment should be dry, well-ventilated, free from corrosive substances, free from electromagnetic interference, and with a temperature between -29°C and 50°C.
2. The equipment should be placed on a stable surface and should maintain a certain distance from surrounding objects for heat dissipation.
