

## ZT-ESS-F261kWh

- Three-tier architecture BMS management system.
- 125kW energy storage inverter, with the option of an STS (Static Transfer Switch), it can quickly and automatically switch between grid-connected and off-grid modes.
- Outdoor energy storage cabinet with an ingress protection rating of IP55, including a liquid cooling system, a fire protection system, etc.
- Energy Management System (EMS), including a cloud platform and a local dispatch manager.
- Employs advanced and efficient MPPT technology that intelligently optimizes photovoltaic array output. Precisely track max power points in real-time, significantly enhancing energy capture efficiency. Features wide voltage range characteristics, adapting to diverse component configurations, supporting multiple independent MPPT channels to effectively increase photovoltaic self-consumption ratios. Through DC coupling technology between photovoltaic panels and batteries, further elevates energy conversion efficiency, shortening investment return periods.

| Model                                      | ZT-ESS-F261kWh  |
|--|---|
| Certification                              | IEC62619, EN62477, EN IEC 61000-6-1/2/3/4, UN38.3, UL9540A, FCC |
| DC battery parameters                      |   |
| Cell type                                  | LiFePO <sub>4</sub> Battery, 3.2V/314Ah                         |
| Battery PACK configuration                 | 1P52S/52kWh   |
| Battery system configuration               | 1P260S  |
| Battery voltage range                      | 702-936V  |
| Battery system capacity                    | Available capacity: 240kWh (Rated capacity: 261kWh)             |
| Temperature detection                      | Cell + Aluminum Busbar  |
| System Parameters                          |   |
| DC side system efficiency                  | ≥95%  |
| Charge-discharge rate                      | ≤0.5C   |
| DC input protection                        | Load switch + Fuse  |
| Fire protection system                     | Novec 1230 + Water fire protection (optional)                   |
| General Parameters                         |   |
| Dimensions (Width × Depth × Height)        | 1000*1383*2189mm (Main body)                                    |
|  | 1190*1460*2410mm (With packaging)                               |
| Allowable ambient temperature              | -30°C~50°C (Derating when the temperature is higher than 45°C)  |
| Allowable relative humidity                | < 95% (No condensation)   |
| Allowable altitude                         | 3000m (Derating when the altitude is higher than 2000m)         |
| Weight (kg)                                | 2355±30kg/2455±30kg (With packaging)                            |
| Protection class/Ingress protection rating | IP55  |
| Cooling method                             | Liquid cooling  |
| Cycle life                                 | 8000 cycles   |
| Communication                              |   |
| Communication interface                    | RS485/Ethernet  |
| Communication protocol                     | IEC61850/MODBUS-RTU/MODBUS-TCP                                  |
