

HQ Mount | 35mm Anodized Aluminum Solar Mid Clamp | for PV System & Solar Power Projects | TUV Certified

HQ MOUNT Solar Panel Mount Mid Clamps, 35mm Aluminum Solar Mid Clamp Solar Panel System Install for PV System

---

About this item:

HQ-IC01 is produced directly by solar mounting manufacturer HQ Mount, designed according to EU standard and fits Japan standard, made Aluminum alloy AL6005-T5 for a better strength and corrosion resistance.

Warranty: 12years for our pv module clamp

Bracket total size: 40\*15\*3mm

Screw nut size: M8\*40/45 (10mm more than solar panel thickness)

Material: Aluminum alloy

Fix 35mm/30mm thickness framed solar panels, universal mid clamp

Package contains: 200pcs of solar mid clamp

Surface: Silver anodized, black anodized, mill surface available

Cutting length: 40mm, 50mm, 60mm, 70mm, 100mm, 110mm, etc

Delivery: Pre-assembled solar panel clamp to save installation time

MOQ: 1000PCS

## Product details

### Description:

Material: PV mid clamps are Made of aluminum alloy 6005-T5 (6061/6063 Available), light weight, strong and durable, surface anodized, better anti-corrosion and rust resistance, can work in hot, cold or humid environments, long service life.

Function: Solar Panel Middle Clamp can firmly connect two solar panels to the rails, fixing and protecting the solar panels.

Easy to install: Solar panel middle clamp are easy to install. All you need is a hex wrench (not included) to secure the solar panel to the surface of the stand and connect it to the rails.

Application: Aluminum solar panel center clamps can attach solar panels to rails, suitable for most solar panel installation and fixation on solar roof system, solar power plants, solar carport, etc.

Produced by: Solar mounting manufacturer with 5 factory locations, over 15000 m2 factory

QC Control: Material-extrusion-cutting-punching-assembly-packing-loading all under strict QC control

Service: We provide technical support, installation guidance and customization available

HQ Mount solar components

Direct Manufacturer with Quality Assurance: Produced by HQ Mount with 12-year warranty, ensuring reliable performance and long-term project safety.

Premium Anodized Aluminum Alloy: Made of 6005-T5 aluminum, surface anodized for superior corrosion resistance, suitable for harsh outdoor environments.

Wide Compatibility & Multiple Sizes: Fits standard 35mm/30mm framed solar panels. Available in lengths from 40mm to 110mm to meet various installation needs.

Easy & Fast Installation: Streamlined design reduces on-site assembly time, saving labor costs for commercial and industrial projects.

Bulk Supply for Projects: Ready for bulk orders with flexible MOQ. Packed in cartons on wooden pallets for secure shipping worldwide
