

ULTRA

SLOPED ROOF MOUNT

FEATURES

- Low profile design saves cost and looks great
- Minimal roof loading (typically under 4psf)
- Compatible with attachments for most roof types
- Silver and Black options available

ADVANTAGES

- Integrated bonding
- Rail levelling up to 2" on mounting feet
- Rodent guards available
- Watertight attachments

The Fast-Rack Ultra rail system is designed for rapid installation of PV arrays on sloped roofs. Standard Fast-Rack features include easy rail leveling, self sealing roof bolts, and integrated bonding. The system was designed to provide Canadians with a cost effective and elegant solution. The Fast-Rack Ultra is fully engineered and CSA certified to meet the highest standards.

MADE IN CANADA

ULTRA - SLOPED ROOF MOUNT

The Fast-Rack Ultra is a complete rail-based mounting system for sloped roofs. The kit includes rails, mid and end clamps, L-feet, splices, bonding straps and bond lugs.

The FR-Ultra is compatible with any roof type and most attachment brackets for both truss and rafterless installations.

Clamp Options

Compatible with all Fast-Rack clamps, available in both silver and black.

- Click-Lock Clamps
- T-Bolt Clamps
- Hidden End Clamps

Superior Aesthetics

The FR-Ultra system is available in both silver and black, providing a sleek look for any installation.
