

New Design Advanced Ballast Solar Mounting System

Product Features

- Suitable for any flat surfaces.
- Crafted from high-grade aluminium, lightweight yet long-lasting durability.
- Easy transportation and installation, saving you both time and money.
- No roof penetration.
- Unlimited expansion, unlock the full potential of your roof space for increased number of solar panels.

Technical Parameters

| | |
|---------------------------|---|
| Application | Flat roofs ≤ 5° with single ply membrane or bituminous roof covering/concrete/ graveled / green roofs/ trapezoidal metal sheet roofs with continuous mounting rails |
| Fasten type/Roof fixture | Ballasted/ No roof penetration |
| Technical Specifications | Thermal separation after max.12m (trapezoidal sheet metal 8.7m); Minimum clearance to roof edge 600mm |
| Applicable Solar Panel | Framed or Frameless |
| Inclination Tilt Material | 10° |
| | AL6005-T5 & SUS304 |
