

Fishery-PV Integration Solar Mounting System

## Product Features

- Single column structure, the foundation occupies a small area.
- High degree of pre-installation, more convenient site construction.
- The solar structure is stable, and the concrete pile has strong corrosion resistance.
- No need to weld, no need to level the land, save construction costs.
- Double row arrangement of components, optimized pile spacing design, better cost budget.
- The height of the support can be adjusted according to the needs of crop growth and water depth.

## Technical Parameters

Installation Tilt	Design according to customer requirements
Warranty	10 years
Applicable panels	Framed/frameless
Ground Clearance	Design according to customer requirements
Wind load	40m/s
Snow load	1.4KN/m <sup>2</sup>
Surface treatment	Galvanized/galvanized magnesium aluminum
Solar panel arrangement	Vertical
