

PV-ezRack SolarTerrace II-A

Pre-assembled, durable and earthed ground mount frame with ramming

PV-ezRack SolarTerrace II-A

Pre-assembled, durable and earthed ground mount frame with ramming

PV-ezRack SolarTerrace II-A is a pre-assembled ground mount system with full earthing function suitable for commercial and utility scale installations. This quality frame is trimmed at every angle for fast deployment reducing labour costs. It was designed with a unique post profile which allows reduced embedment and therefore saves on material and labour. These features, combined with its high grade of pre-assembly make SolarTerrace II-A one of the best ground mount system you can find.

Main Benefits

Reduced labour costs

Through our unique, patented component design and pre-assembled supports with pre-installed positioning clamps** labour time and costs are greatly reduced.

Reduced component costs

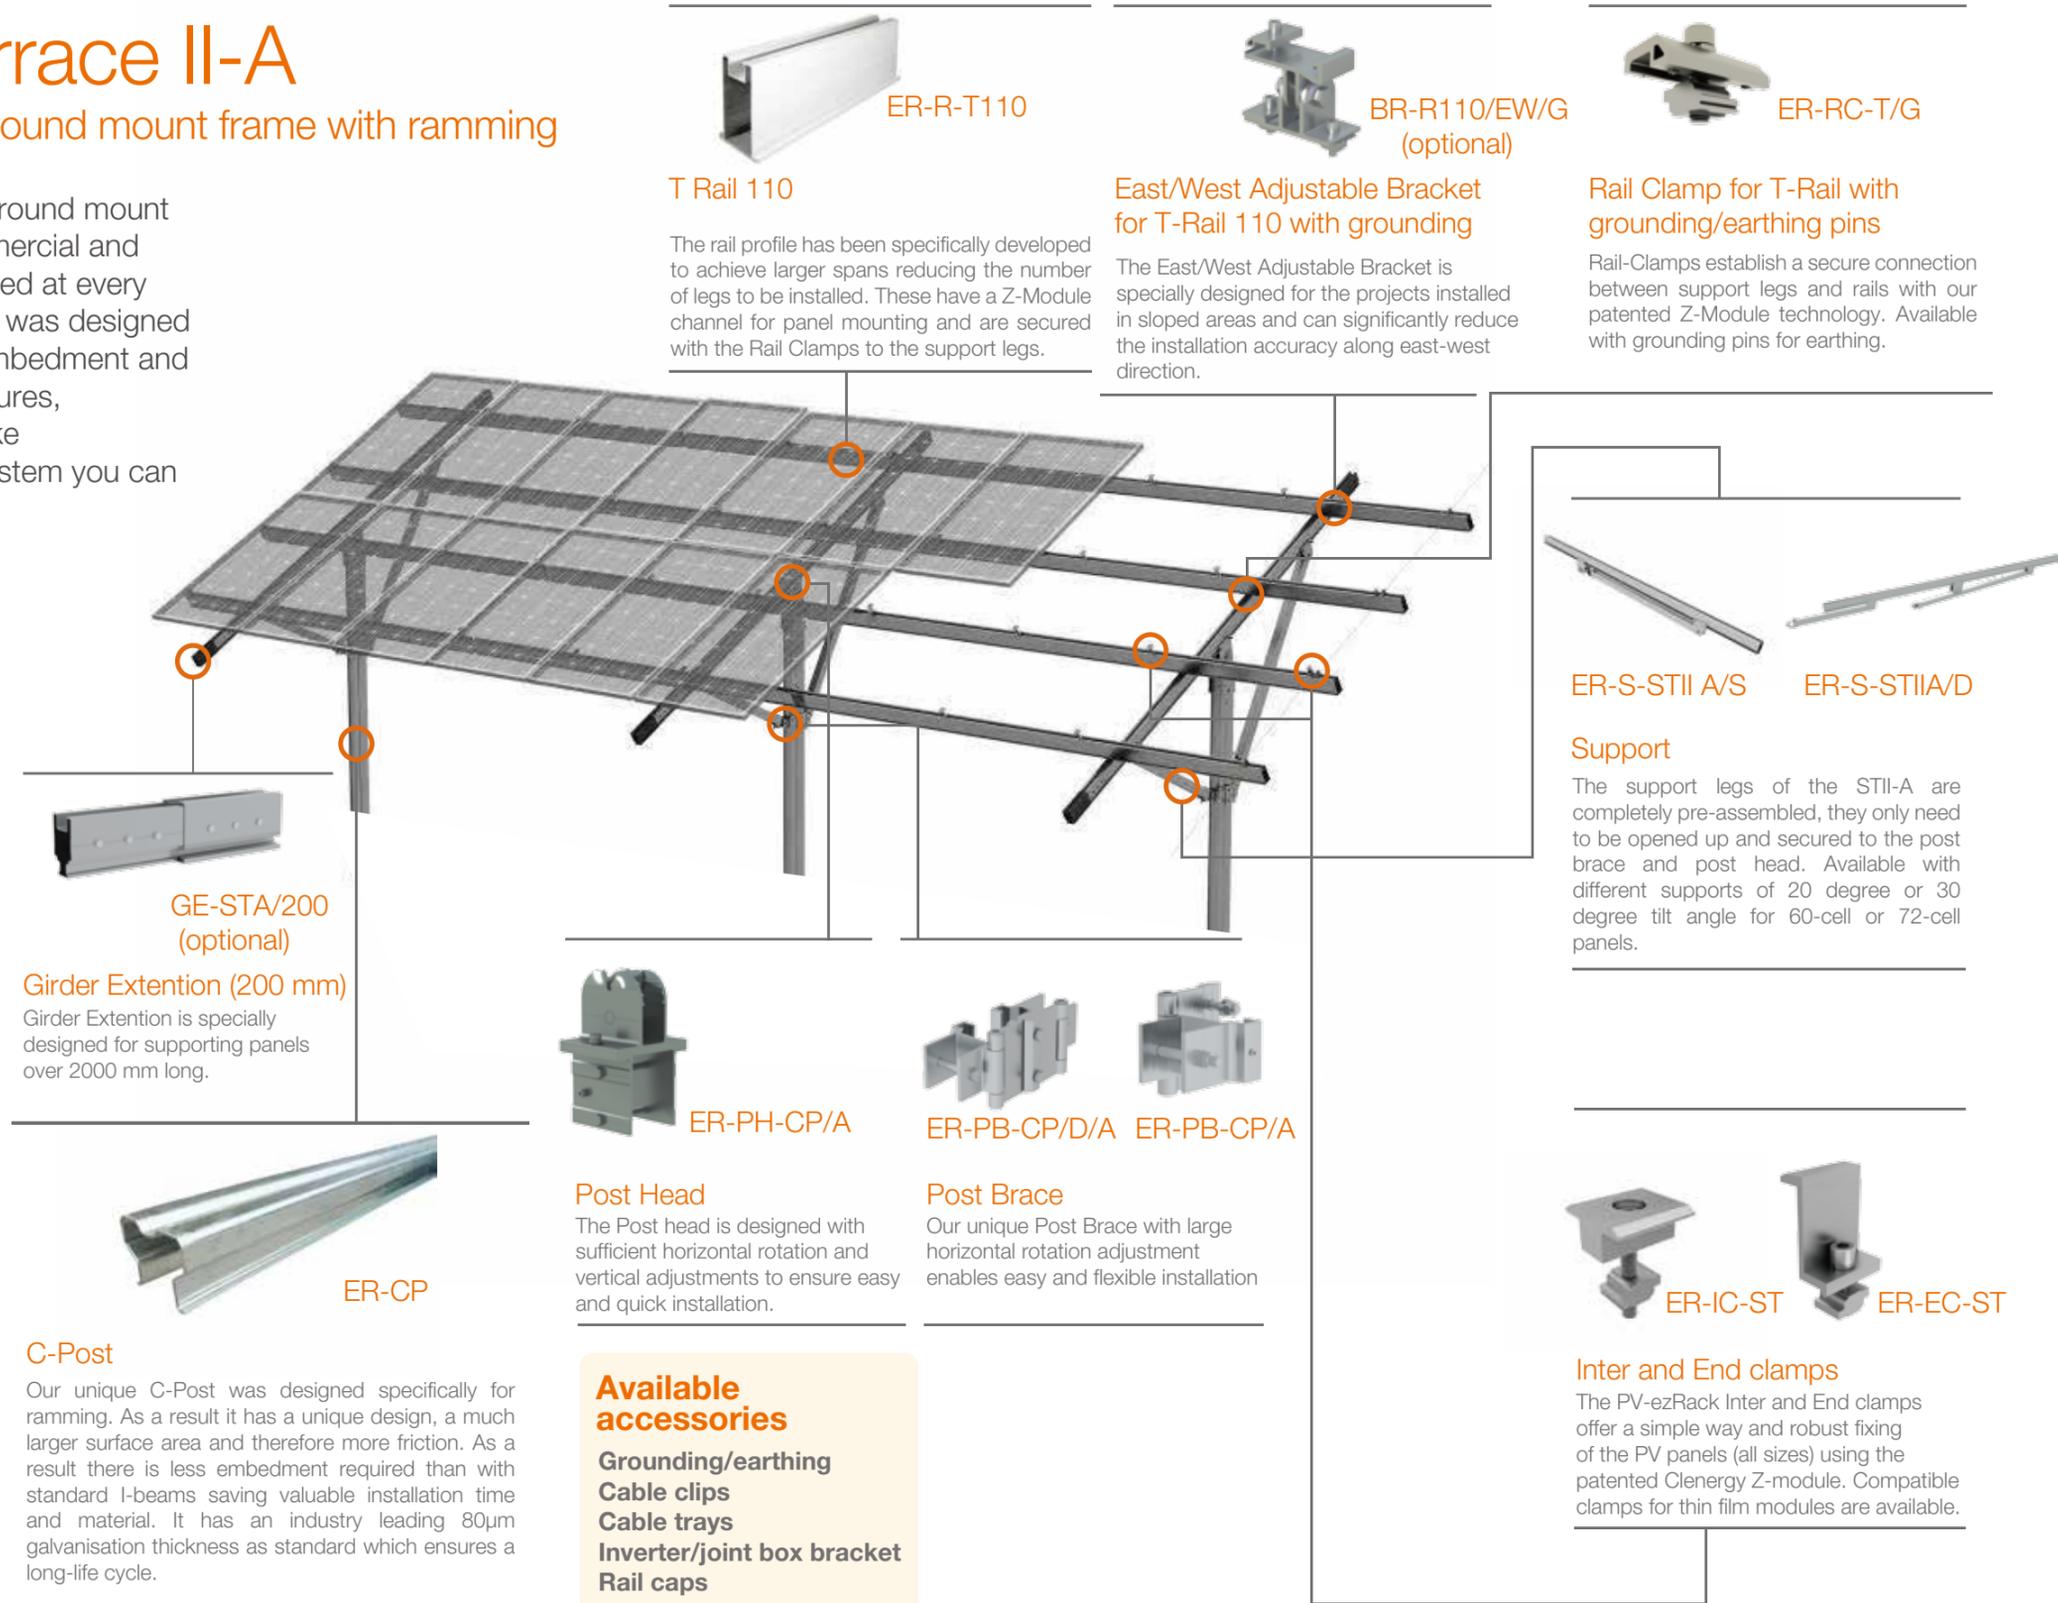

Our unique C-Post was designed specifically for ramming. This results in an increased friction against up-lift and it therefore requires less embedment as conventional standard posts or I-beams, which reduces not only labour time for ramming but also material costs.

Wide range of adjustments

As ramming can never be done exact on millimetre the Post head is designed with sufficient horizontal rotation and vertical adjustments. This combined with a generous design tolerance levels makes it easy to get the panels perfectly aligned even if the ramming isn't 100%.

Full earthing function

With pre-fitted pressure bolts and star washers in post head, post brace and pre-assembled support, it can create earthing continuity from T rail to post. In this way, SolarTerrace II-A system is a full earthing system.

T Rail 110

The rail profile has been specifically developed to achieve larger spans reducing the number of legs to be installed. These have a Z-Module channel for panel mounting and are secured with the Rail Clamps to the support legs.

East/West Adjustable Bracket for T-Rail 110 with grounding

The East/West Adjustable Bracket is specially designed for the projects installed in sloped areas and can significantly reduce the installation accuracy along east-west direction.

Rail Clamp for T-Rail with grounding/earthing pins

Rail-Clamps establish a secure connection between support legs and rails with our patented Z-Module technology. Available with grounding pins for earthing.

GE-STA/200 (optional) Girder Extension (200 mm)

Girder Extension is specially designed for supporting panels over 2000 mm long.

ER-CP C-Post

C-Post

Our unique C-Post was designed specifically for ramming. As a result it has a unique design, a much larger surface area and therefore more friction. As a result there is less embedment required than with standard I-beams saving valuable installation time and material. It has an industry leading 80µm galvanisation thickness as standard which ensures a long-life cycle.

ER-PH-CP/A Post Head

Post Head

The Post head is designed with sufficient horizontal rotation and vertical adjustments to ensure easy and quick installation.

ER-PB-CP/D/A ER-PB-CP/A Post Brace

Post Brace

Our unique Post Brace with large horizontal rotation adjustment enables easy and flexible installation

Available accessories

- Grounding/earthing
- Cable clips
- Cable trays
- Inverter/joint box bracket
- Rail caps

Materials

AL6005-T5 | SUS304 | Q235B

ER-S-STII A/S ER-S-STIIA/D Support

Support

The support legs of the STII-A are completely pre-assembled, they only need to be opened up and secured to the post brace and post head. Available with different supports of 20 degree or 30 degree tilt angle for 60-cell or 72-cell panels.

ER-IC-ST ER-EC-ST Inter and End clamps

Inter and End clamps

The PV-ezRack Inter and End clamps offer a simple way and robust fixing of the PV panels (all sizes) using the patented Clenergy Z-module. Compatible clamps for thin film modules are available.

10 Year Warranty*

Utility

Commercial

12 Panels per man-hour (ramming excluded)

*see Clenergy PV-ezRack warranty for further details
**available for direct shipments larger than 250kW
