

Ground Mount Solar Mounting System **ZM2 V**

ZM2 – **Options**

Cost Effective – high structural performance – German quality

- **V-profile post**, made with high tensile steel, strict galvanization standards, with a large surface area and a unique V form.
- Designed with our structural engineering experts, **optimizing anchor system solutions** to on-site geotechnical conditions.
- Fast and easy assembly, minimal components and long span capabilities (up to 6 meters).
- Height, pitch and inclination are adjustable during assembly.
- Longevity and durability of the system is ensured through high-quality components and a certified galvanization process.
- **Supply capacity, of up to 30 MW of mounting systems per week (depending on system)**
- Also available as a Slide-in System (See Page 14)

Options

We are able to produce unique, project specific designs. This enables Zimmermann to produce individual, designs variations tailored to meet project specific requirements.

Typical system designs allow for inclinations from 5 to 30 degrees; hold 1 or 4 modules in portrait or 4 to 6 modules in landscape (for standard module dimensions).
