PHOTON Laboratory talks about our modules:
'Eurener is one of the oldest module manufacturers in Europe: the Spanish company was founded in 1997 . I. I Is distinguished by having values that are over the average the temperature coefficient is quite better than other modules that are in the test field. The curve behavior at different irradiance conditions shows a marked efficiency increase in radiations from medium to high, and a slight drop in efficiency at low irradiance conditions. These factors show that this module could reach higher performonce than the average in long-term measurements:
