#### Solar Charge Controller CD series (CD12/2410-12/24V10A) With DC Loads Function

#### Description

The new version of C series solar charge controller series is especially designed for small solar systems with the need of a low battery disconnect feature.

Leisure and rural electrification systems are the typical applications for this product. It is perfect solution for cost-sensitive systems which require state-of-the-art system management.

### Features

- 5 LED indications: charge status, SOC, LVD, overload/short circuit
- Maximum 16 sq.mm connecting terminals
- Fully electronically protected: Panel surge voltage, wrong polarity at
- panel or battery, overload and short circuit at load.
- The melting fuse of the prodecessor has been replaced by a fully
- electronically protected circuit
- Selectable charging model (Gel & Sealed battery type)
- Reverse blocking MOSFET
- Automatic temperature compensation
- Common positive allows grounding

# Specifications

| Model                         | CD12/2410-12/24V10A                                    |                   |
|-------------------------------|--------------------------------------------------------|-------------------|
| Norminal (system) Voltage     | 12/24V auto. Detection                                 |                   |
| Battery Selection             | Liquid Electrilyte                                     | GEL(VRLA Battery) |
| Boost Voltage                 | 14.5V/29V (25℃)                                        | 14.3V/28.6V (25℃) |
| Equalization Voltage          | 14.8V/29.6V (25℃)                                      | 14.4V/28.8V (25℃) |
| Float Voltage                 | 13.7V/27.4V (25℃)                                      | 13.6V/27.2V (25℃) |
| Low Voltage Disconnect        | 11/22V controlled by voltage                           |                   |
| Low Reconnect Voltage         | 12.8V/25.6V                                            |                   |
| Max. Charging Current         | 10A                                                    |                   |
| Max. DC Output                | 10A                                                    |                   |
| Protections                   | PV & Battery Reverse Polarity, Overload, Short-circuit |                   |
| Self Current Consumption      | 4mA                                                    |                   |
| Operating Temperature Range   | -40~50℃                                                |                   |
| Auto.Temperature compensation | Yes                                                    |                   |
| Charging model selectable by  | Adjusting on PCB                                       |                   |
| Max. Wire Size                | 16 m <sup>m<sup>2</sup></sup> (AWG#6)                  |                   |
| Dimension                     | 8.5*7*3.6cm                                            |                   |
| Case Protection               | IP22                                                   |                   |
| Case Material                 | ABS                                                    |                   |
| Product Weight                | 120g                                                   |                   |
| Case Color                    | Blue, Silver and Black selectable                      |                   |
| Packing                       | Color box, 100 pcs/16.6Kg/Carton(55.5*24.5*36cm)       |                   |

#### Solar Charge Controller CD series(CD12/2412-12/24V12A) With DC Loads Function

#### Description

The new version of C series solar charge controller series is especially designed for small solar systems with the need of a low battery disconnect feature.

Leisure and rural electrification systems are the typical applications for this product. It is perfect solution for cost-sensitive systems which require state-of-the-art system management.

# Features

- 5 LED indications: charge status, SOC, LVD, overload/short circuit
- Maximum 16 sq.mm connecting terminals
- Fully electronically protected: Panel surge voltage, wrong polarity at
- panel or battery, overload and short circuit at load.
- The melting fuse of the prodecessor has been replaced by a fully
- electronically protected circuit
- Selectable charging model (Gel & Sealed battery type)
- Reverse blocking MOSFET
- Automatic temperature compensation
- Common positive allows grounding

# Specifications

| Model                         | CD12/2412-12/24V12A                                    |                    |
|-------------------------------|--------------------------------------------------------|--------------------|
| Norminal (system) Voltage     | 12/24V auto. Detection                                 |                    |
| Battery Selection             | Liquid Electrilyte                                     | GEL(VRLA Battery)  |
| Boost Voltage                 | 14.5V/29V (25°C)                                       | 14.3V/28.6V (25°C) |
| Equalization Voltage          | 14.8V/29.6V (25℃)                                      | 14.4V/28.8V (25°C) |
| Float Voltage                 | 13.7V/27.4V (25℃)                                      | 13.6V/27.2V (25°C) |
| Low Voltage Disconnect        | 11/22V control                                         | lled by voltage    |
| Low Reconnect Voltage         | 12.8V/25.6V                                            |                    |
| Max. Charging Current         | 12A                                                    |                    |
| Max. DC Output                | 12A                                                    |                    |
| Protections                   | PV & Battery Reverse Polarity, Overload, Short-circuit |                    |
| Self Current Consumption      | 4mA                                                    |                    |
| Operating Temperature Range   | -40~50℃                                                |                    |
| Auto.Temperature compensation | Yes                                                    |                    |
| Charging model selectable by  | Adjusting on PCB                                       |                    |
| Max. Wire Size                | 16 m <sup>m<sup>2</sup></sup> (AWG#6)                  |                    |
| Dimension                     | 8.5*7*3.6cm                                            |                    |
| Case Protection               | IP22                                                   |                    |
| Case Material                 | ABS                                                    |                    |
| Product Weight                | 120g                                                   |                    |
| Case Color                    | Blue, Silver and Black selectable                      |                    |
| Packing                       | Color box, 100 pcs/16.6Kg/Carton(55.5*24.5*36cm)       |                    |

#### Solar Charge Controller CD series(CD12/2415-12/24V15A) With DC Loads Function

#### Description

The new version of C series solar charge controller series is especially designed for small solar systems with

the need of a low battery disconnect feature. Leisure and rural electrification systems are the typical applications for this product. It is perfect solution for

cost-sensitive systems which require state-of-the-art system management.

### Features

- 5 LED indications: charge status, SOC, LVD, overload/short circuit
- Maximum 16 sq.mm connecting terminals
- Fully electronically protected: Panel surge voltage, wrong polarity at
- panel or battery, overload and short circuit at load.
- The melting fuse of the prodecessor has been replaced by a fully
- electronically protected circuit
- Selectable charging model (Gel & Sealed battery type)
- Reverse blocking MOSFET
- Automatic temperature compensation
- Common positive allows grounding

# Solar Charge Controller CD series(CD12/2420-12/24V20A)

#### Description

With DC Loads Function

The new version of C series solar charge controller series is especially designed for small solar systems with the need of a low battery disconnect feature.

Leisure and rural electrification systems are the typical applications for this product. It is perfect solution for cost-sensitive systems which require state-of-the-art system management.

#### Features

- 5 LED indications: charge status, SOC, LVD, overload/short circuit
- Maximum 16 sq.mm connecting terminals
- Fully electronically protected: Panel surge voltage, wrong polarity at
- panel or battery, overload and short circuit at load.
- The melting fuse of the prodecessor has been replaced by a fully
- electronically protected circuit
- Selectable charging model (Gel & Sealed battery type)
- Reverse blocking MOSFET
- Automatic temperature compensation
- Common positive allows grounding

# Specifications

| Model                              | CD12/2420-12/24V20A                                    |                    |
|------------------------------------|--------------------------------------------------------|--------------------|
| Norminal (system) Voltage          | 12/24V auto. Detection                                 |                    |
| Battery Selection                  | Liquid Electrilyte                                     | GEL(VRLA Battery)  |
| Boost Voltage                      | 14.5V/29V (25°C)                                       | 14.3V/28.6V (25°C) |
| Equalization Voltage               | 14.8V/29.6V (25℃)                                      | 14.4V/28.8V (25°C) |
| Float Voltage                      | 13.7V/27.4V (25℃)                                      | 13.6V/27.2V (25°C) |
| Low Voltage Disconnect             | 11/22V controlled by voltage                           |                    |
| Low Reconnect Voltage              | 12.8V/25.6V                                            |                    |
| Max. Charging Current              | 20A                                                    |                    |
| Max. DC Output                     | 20A                                                    |                    |
| Protections                        | PV & Battery Reverse Polarity, Overload, Short-circuit |                    |
| Self Current Consumption           | 4mA                                                    |                    |
| <b>Operating Temperature Range</b> | -40~50°C                                               |                    |
| Auto.Temperature compensation      | Yes                                                    |                    |
| Charging model selectable by       | Adjusting on PCB                                       |                    |
| Max. Wire Size                     | 16 m <sup>m<sup>2</sup></sup> (AWG#6)                  |                    |

# Solar Charge Controller CD series(CD12/2425-12/24V25A)

### Description

With DC Loads Function

The new version of C series solar charge controller series is especially designed for small solar systems with the need of a low battery disconnect feature.

Leisure and rural electrification systems are the typical applications for this product. It is perfect solution for cost-sensitive systems which require state-of-the-art system management.

### Features

- 5 LED indications: charge status, SOC, LVD, overload/short circuit
- Maximum 16 sq.mm connecting terminals
- Fully electronically protected: Panel surge voltage, wrong polarity at
- panel or battery, overload and short circuit at load.
- The melting fuse of the prodecessor has been replaced by a fully
- electronically protected circuit
- Selectable charging model (Gel & Sealed battery type)
- Reverse blocking MOSFET
- Automatic temperature compensation
- Common positive allows grounding

# Specifications

| Model                         | CD12/2425-12/24V25A                                    |                    |
|-------------------------------|--------------------------------------------------------|--------------------|
| Norminal (system) Voltage     | 12/24V auto. Detection                                 |                    |
| Battery Selection             | Liquid Electrilyte                                     | GEL(VRLA Battery)  |
| Boost Voltage                 | 14.5V/29V (25°C)                                       | 14.3V/28.6V (25°C) |
| Equalization Voltage          | 14.8V/29.6V (25°C)                                     | 14.4V/28.8V (25°C) |
| Float Voltage                 | 13.7V/27.4V (25°C)                                     | 13.6V/27.2V (25°C) |
| Low Voltage Disconnect        | 11/22V controlled by voltage                           |                    |
| Low Reconnect Voltage         | 12.8V/25.6V                                            |                    |
| Max. Charging Current         | 25A                                                    |                    |
| Max. DC Output                | 25A                                                    |                    |
| Protections                   | PV & Battery Reverse Polarity, Overload, Short-circuit |                    |
| Self Current Consumption      | 4mA                                                    |                    |
| Operating Temperature Range   | -40~50°C                                               |                    |
| Auto.Temperature compensation | Yes                                                    |                    |
| Charging model selectable by  | Adjusting on PCB                                       |                    |
| Max. Wire Size                | 16 m <sup>m<sup>2</sup></sup> (AWG#6)                  |                    |
| Dimension                     | 11.5*9.1*4.8cm                                         |                    |
| Case Protection               | IP22                                                   |                    |
| Case Material                 | ABS                                                    |                    |
| Product Weight                | 244g                                                   |                    |
| Case Color                    | Blue, Silver and Black selectable                      |                    |
| Packing                       | Color box, 50 pcs/16Kg/Carton(51*30*26.5cm)            |                    |

# Solar Charge Controller CD series(CD12/2430-12/24V30A)

#### Description

With DC Loads Function

The new version of C series solar charge controller series is especially designed for small solar systems with the need of a low battery disconnect feature.

Leisure and rural electrification systems are the typical applications for this product. It is perfect solution for cost-sensitive systems which require state-of-the-art system management.

### Features

- 5 LED indications: charge status, SOC, LVD, overload/short circuit
- Maximum 16 sq.mm connecting terminals
- Fully electronically protected: Panel surge voltage, wrong polarity at
- panel or battery, overload and short circuit at load.
- The melting fuse of the prodecessor has been replaced by a fully
- electronically protected circuit
- Selectable charging model (Gel & Sealed battery type)
- Reverse blocking MOSFET
- Automatic temperature compensation
- Common positive allows grounding

# Specifications

| Model                              | CD12/2430-12/24V30A                                    |                   |
|------------------------------------|--------------------------------------------------------|-------------------|
| Norminal (system) Voltage          | 12/24V auto. Detection                                 |                   |
| Battery Selection                  | Liquid Electrilyte                                     | GEL(VRLA Battery) |
| Boost Voltage                      | 14.5V/29V (25°C)                                       | 14.3V/28.6V (25℃) |
