Your recycling needs. Our grinding solutions.

Granulators dedicated to scraps recovery from rigid or flexible extrusion for small sprues or heavy moulds, also suitable for second step grinding of pre-crushed pieces.

The granulators of this series, thanks to the special design of the grinding chamber, are also widely used for an immediate and safe inline grinding of film and trims.

Access without tools to the main parts subject to ordinary maintenance.

Rotary discs integral with the rotor and rings. Arrow cutting configuration for grinders with 3 or 5 knives; bench adjustment of rotating and fixed knives.

Rotor lock for maintenance. Safety devices and circuit in compliance with EEC Directives.

Grinding chamber water cooling. Surface screen equal to approximately 50% of knives rotation length.

Hopper opening with motorized jack and screen-holder opening by gas cylinder.
