

# Albamat 800 V5

- » *sturdy and mobile*
- » *robust*
- » *high throughput*
- » *high bale weights*
- » *80 t pressing force*

## Properties

- » suited for pressing: paper, cardboard, printing waste, foil, PET, hard plastics, tiling
- » vertical stamp, oil cooler as well as tank and cabinet heater as standard equipment
- » ground slide and piston valve for covering the needle opening (prevents contamination of the binding unit with plastic particles, etc.)
- » channel adjustment - 3 sides, hydraulic-automatic
- » photocell control in the filling chute
- » continuous feeding by means of flat conveyor or similar
- » fast cycle times
- » additional photocell for overfilling
- » collapsible binding device for transport and service
- » suitable for medium to high traffic material
- » operator side freely selectable
- » simple operation via touch panel
- » from 60 KW motor drive with Hardox guide

## Technical data

pressing force [kN/t]	800/80		
specific pressing force [N/cm <sup>2</sup> ]	98		
<hr/>			
motor (kW)	30	45	60
throughput cardboard B19, approx. [t/h]	4,0	5,0	7,2
volume idle running [m <sup>3</sup> /h]	170	225	314
volume-working conditions [B19 m <sup>3</sup> /h]	102	146	188
cycle time [sec]	23	18	13
<hr/>			
feed opening W x L [mm]	1140 x 1470		
tying system	vertical, 5-fold, automatically		
bale size W x H x L [mm]	1080 x 730 x 1200		
bale weight, paper, cardboard [kg]	approx. 650 kg (depend on input weight and material)		
machine weight [kg]	12000		

## Abba – Environmental and press technology. Channel baling presses at a top price-performance ratio.

We from abba-press technology, are manufacturers of fully automatic channel baling presses with horizontal and vertical tying system. Our fully automated, mobile channel baling presses are distinguished by a high throughput with low energy consumption and easy operation.

Another characteristic of our channel baling presses is the compact and simple design (arrangement of the press cylinder advantageously crossed) with dependable cutting and drill station. Our channel baling presses are ideal for compressing: corrugated paper and board from commercial premises, de-inking, mixed-waste-paper, corrugated paper of all other kinds, films (landscape films); PET bottles, hard plastic, beverage cans etc.
