

Medium-sized vertical double-cylinder hydraulic balers

Scope:

Wide application , with double cylinders, suitable for pressing a variety of waste paper ,soft and hard plastic, and other materials, widely used in factories and recycling industry.

PRODUCT INTRODUCTION

The machine uses hydraulic transmission, with double-cylinder, durable and powerful. Centralized control with buttons and upper hydraulic system design.save space. Separated feed opening, push bale out automatically, easy to operate, interlock device beside feed opening, safety and reliable. Double hydraulic cylinders design to ensure the force balance during compression.

The feeding chamber adopts special device to prevent material rebound, save feeding time greatly.
