

Heavy duty vertical double-cylinder hydraulic balers (two doors opening, front and side)

Scope:

Widely used for waste plastic (hard and soft plastic), fiber, sponges, and etc; the bale can be strapped as “#” cross.

PRODUCT INTRODUCTION

The machine uses double-cylinder balance compressing and the special hydraulic system to make the power more stable during compression.

High load structure. pushing bale out device automatically , When operation more safety and reliable. Right-angle opening door type ,can strap as “#” shape . Chamber installed with anti-rebound device.
