

Small-sized horizontal fully automatic balers

Scope:

Small-sized horizontal automatic models, can be strapped by iron wire automatically, widely used in packaging factory, carton factory, printing factory, waste classifying processing stations, professional waste recycle station and other place; Suitable for waste paper, cardboard, plastic, fabric, fiber, household garbage, etc. and can connect with conveyor line or air-blower to feed materials.

PRODUCT INTRODUCTION

PLC program, touch screen control, operated simply and equipped with automatic feeding detection, can realize unmanned operation. Special automatic strapping device with simple structure, fast and stable, low failure rate and easy to maintain. Start-up motor and pressurized motor in order to save electricity energy and cost. Inspecting failure and display automatically, improving the efficiency of detection. Bale length can be set freely and records bale numbers accurately. Special recessed multipoint blade design to improve cutting efficiency and extend the working life of blade. The automatic baler can connect with air blower, pipeline or conveyor to feed material directly.
